

THE BUSINESS ARCHITECT

EUROPEAN WEEKLY OBSERVATIONS ON SERVICES, CHAINS AND OPERATING MODELS

REPORT · 8 OCTOBER 2026 · EDITION 26-41

CENTRAL OBSERVATION European digital services now depend on shared roles, proof, recovery work and exception journeys.

WEEKLY SELECTION · FIVE SIGNALS FROM A WIDER SCAN OF POLICY, LAW, THREATS, STANDARDS AND TECHNOLOGY

1 Farm identity changes chain roles

EUROPEAN COMMISSION · 1 OCT 2026 · SOURCE 1

- FACT** Ten jurisdictions launched the Agri Food EDIC. Its first missions include a federated Digital Farm ID aligned with EUDI and shared data and AI services.
- IMPACT** A federated identifier can connect reporting, traceability and AI services.
- TENSION** Less administration requires agreement on who corrects and vouches for data.
- DECISION** Model enrolment, delegation, correction, dispute and withdrawal journeys.

2 Age proof reshapes customer access

EUROPEAN COMMISSION · 2 OCT 2026 · SOURCE 2

- FACT** The Commission opened feedback on the proposed EU KIDS Act until 26 November, including age thresholds, safety by design and privacy preserving age assurance.
- IMPACT** The KIDS Act proposal introduces new entry conditions for online services.
- TENSION** Safer access can also exclude people or expose more personal information.
- DECISION** Design age, guardian, appeal and assisted service journeys together.

3 Disruption planning includes rebuild work

UK NCSC · 1 OCT 2026 · SOURCE 3

- FACT** The UK NCSC published guidance covering critical asset discovery, continuity, technical recovery, crisis decisions and rebuilding after disruptive cyber attacks.
- IMPACT** NCSC guidance separates immediate action, recovery and controlled rebuilding.
- TENSION** Restoring a service quickly may recreate the conditions that enabled attack.
- DECISION** Define service priorities, manual work, decision rights and safe return criteria.

4 Platform flaws cross business processes

CERT-EU · 7 OCT 2026 · SOURCE 4

- FACT** CERT-EU warned of CVE-2026-21589, a critical unauthenticated file access flaw affecting multiple Atlassian Data Center products.
- IMPACT** The Atlassian issue can affect development, knowledge and service workflows.
- TENSION** One suite simplifies work and can interrupt several value streams at once.
- DECISION** Identify critical workflows and agree temporary operating modes.

5 Digital euro recruits merchants

ECB · 6 OCT 2026 · SOURCE 5

- FACT** The ECB briefed merchants on joining the digital euro pilot, including remote payments, selection, onboarding, integration and testing towards a 2027 pilot.
- IMPACT** Merchants will integrate with PSPs and test remote payment acceptance.
- TENSION** A payment pilot also creates support, refund and reconciliation work.
- DECISION** Design the complete pilot journey, including failure, dispute and exit.

SECTOR IMPACT

Material implications in this edition

 **PUBLIC SECTOR** **DIRECT**
Identity and recovery alter service duties. Map citizen fallback and authority.

 **FINANCIAL SERVICES** **DIRECT**
Payment journeys change roles. Test refunds, disputes and reconciliation.

 **HEALTHCARE** **DIRECT**
Disruption threatens care processes. Exercise manual work and safe restoration.

 **ENERGY** **DIRECT**
Common tools support field work. Define degraded operation and escalation.

 **LOGISTICS** **DIRECT**
Farm ID affects traceability. Test correction, handoff and missing data.

 **INDUSTRY + MFG.** **DIRECT**
Tool outages affect delivery work. Prepare alternate coordination routes.

 **SERVICES** **DIRECT**
Age proof changes access. Test inclusion, consent, support and appeal.

DECISION AGENDA

ACT NOW

Service owners map manual fallback, exception journeys and decision rights for critical services.

ASSESS

Exercise age proof, tool outage and payment failure; record customer and staff impact.

WATCH

Follow consultation outcomes and pilot rules before changing the permanent operating model.

TRIGGER

Reopen architecture when a shared service changes responsibility or removes an assisted route.
