

THE ENTERPRISE ARCHITECT

Weekly observations on direction, coherence and control

REPORT · 1 OCTOBER 2026 · EDITION 26-40

CENTRAL OBSERVATION

Europe is moving from shared policy to shared operational capability. The portfolio question is no longer only what to adopt, but which common dependencies the organisation can govern, fund and exit.

WEEKLY SELECTION · FOUR DEVELOPMENTS FROM A WIDER SCAN OF POLICY, LAW, THREATS, STANDARDS AND TECHNOLOGY

RESILIENCE BECOMES A SHARED CAPABILITY

[1]

- FACT** The Commission proposed a secure EU communication system for first responders. It must work across borders and when terrestrial networks are unavailable.
- IMPACT** Cross border continuity now depends on a common service, compatible national functions and local fallback.
- TENSION** European scale improves reach, yet can create a common mode dependency.
- DECISION** Place critical communication, local fallback and cross border testing in one investment and governance decision.

INDUSTRIAL CAPACITY ENTERS THE PORTFOLIO

[2]

- FACT** A Commission study for the 2028 to 2034 funding cycle finds strong European science and regulation, but weak scale up and industrial adoption.
- IMPACT** Technology choices increasingly affect European scale up, skills, supply and long term strategic autonomy.
- TENSION** Best current capability can conflict with future European capacity and switching options.
- DECISION** Add industrial anchoring, scale potential and exit cost to portfolio and sourcing criteria.

DIGITAL EURO MOVES INTO EXPERIMENTATION

[3]

- FACT** The ECB opened a new digital euro innovation round. Experiments will use APIs and a test environment from January to June 2027; issuance is not decided.
- IMPACT** Payments, public services and customer channels may gain a common European capability and new ecosystem dependencies.
- TENSION** Early learning is valuable, but a sandbox must not imply production readiness or commitment.
- DECISION** Assign an exploration owner, funding limit and explicit gates for privacy, resilience and adoption.

HUMAN RISK REMAINS A PORTFOLIO RISK

[4]

- FACT** A Commission survey found three in four EU employees encountered suspicious digital contact. Phishing led at 39%; AI generated scams reached 15%.
- IMPACT** Workforce exposure connects identity, workplace, process design, training and incident response.
- TENSION** Local awareness campaigns compete with structural controls and shared investment.
- DECISION** Review the cyber portfolio as one outcome chain, with measurable prevention and recovery evidence.

SECTOR IMPACT

-  **PUBLIC SECTOR** **DIRECT**
Cross border response and public payment uses. Decide shared governance and national fallback.
-  **FINANCIAL SERVICES** **DIRECT**
Digital euro experiments alter the payment ecosystem. Record portfolio gates and coexistence cost.
-  **HEALTHCARE** **CONDITIONAL**
Outage communication can protect care continuity. Test priority, fallback and accountability.
-  **ENERGY** **DIRECT**
Utilities and EV charging are named exploration areas. Map common dependencies and resilience.
-  **LOGISTICS** **CONDITIONAL**
Cross border operations benefit from shared communications. Test roaming and degraded mode.
-  **INDUSTRY + MFG.** **DIRECT**
Funding direction affects strategic suppliers. Assess scale, skills and replacement paths.
-  **SERVICES** **DIRECT**
Workforce exposure affects service reliability. Join identity, process and training investment.

DECISION AGENDA

ACT NOW

Portfolio office: register shared European services as dependencies with owner, fallback and funding horizon.

ASSESS

Compare strategic value, concentration risk and exit cost; record the chosen sourcing balance.

WATCH

Follow the communication proposal and funding programme; translate only when scope and duties settle.

TRIGGER

Reopen architecture if a shared capability becomes mandatory or removes a viable local fallback.
